**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election of Group I, claims 1-4, 6-17 and 19-25 in the reply filed on 06 September 2005 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Claims 5, 18 and 26-33 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 06 September 2005.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 7-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 1732

In claim 7, line 1, "the coatings" does not have clear and proper antecedent basis in the claims (it appears that claim 7 should depend from claim 6, not claim 1).

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-4, 6-17 and 19-25 are rejected under 35

U.S.C. 102(e) as being anticipated by Beebe et al (U.S. Patent 6,488,872 B1).

Beebe et al (see the entire document, in particular, col. 7, line 55 to col. 8, line 7; col. 8, line 66 to col. 9, line 35; col. 10, line 5 to col. 12, line 52) teach a process of making a structure attached to a microfluidic channel using hydrodynamic focusing as claimed, and also teach a process including the steps of introducing a polymerizable fluid and a

Art Unit: 1732

focusing fluid into a hydrodynamic focusing system, hydrodynamically focusing the polymerizable fluid and forming a structure in the hydrodynamic focusing system by polymerizing the polymerizable fluid as claimed.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 2 and 6-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Kenis et al ("Fabrication Inside Microchannels Using Fluid Flow").

Kenis et al (see the entire document, in particular, page 842, second column, part III to page 843, first column; page 844, second column ("Area-Selective Crystal Growth")) teach a process of making a structure attached to a microfluidic channel using hydrodynamic focusing as claimed.
